

SELECTED WORK

Leonardo *Filho.*

Data Engineering Specialist

I connect business systems, automate workflows and build analytics that help companies uncover risks, reduce manual work and make informed decisions.

BELÉM, BRAZIL

01 Quadra One: executive platform

INTERNAL PRODUCT

An executive platform with 51 pages reading BigQuery directly, with corporate sign-in and role-based access.

Reduces dependence on manual reports and brings leaders closer to the operational data used in decisions.

51

pages in production

53

data sources monitored

[Full case study ↗](#)

02 Financial audit automation

INTERNAL PRODUCT

A bot that audits ERP accounts payable against 14 rules, goes through human review and alerts each owner.

Directs teams to real exceptions, reduces rework and makes every alert auditable.

2 → 32

companies covered

58% → 34%

false positive rate

[Full case study ↗](#)

03 Salifort: People Risk Lab

PUBLIC PROJECT

An interactive product that turns an attrition study into signals, scenarios and decisions worth investigating.

Translates a model into an understandable retention investigation experience while keeping the evidence, source and prediction limits visible.

14,999

records analyzed

23.8%

historical attrition rate
